

# Apollo The Cool Bits

- ◆ Automatic update of cache based on a type + id across all the queries
- ◆ Ability to mix local state, graphql state and even REST based state within the same query

# The same Demo with Redux + Rest

- ◆  $1 + 20 * 2 = 41$  http call in total
- ◆ 9 actions just to coordinate those 41 http calls
- ◆ Manual state massaging for each http response
